

PUMP STATION

200 Gallon Fiberglass Pump/Lift Station

Strong Fiberglass Design

These 200 gallon fiberglass tanks are designed to be buried outside of the home. The pump stations can be used as lift stations to transport water and effluent to a higher location.

These tanks are strong and durable. Come with pre-installed anti-floatation rings around the top and bottom. Also come complete with Polylok riser and lid for easy ground level access.

Many Available Options

Can be used with effluent pumps, sewage pump, and grinder pumps of any size. The large 20 inch access makes it easy to install or service even the largest of submersible pumps. 4" inlet grommet standard.

Risers can be added to the top if needed to bring the access to ground level.

Fiberglass Lift/Pump Tank Dimensions

67 inches tall including riser
36 inches wide at the base
48 inches wide at the top

47 inches to bottom of inlet
49 inches to bottom of outlet
