

# PUMP STATION

## 120 GALLON FIBERGLASS LIFT STATION TANK

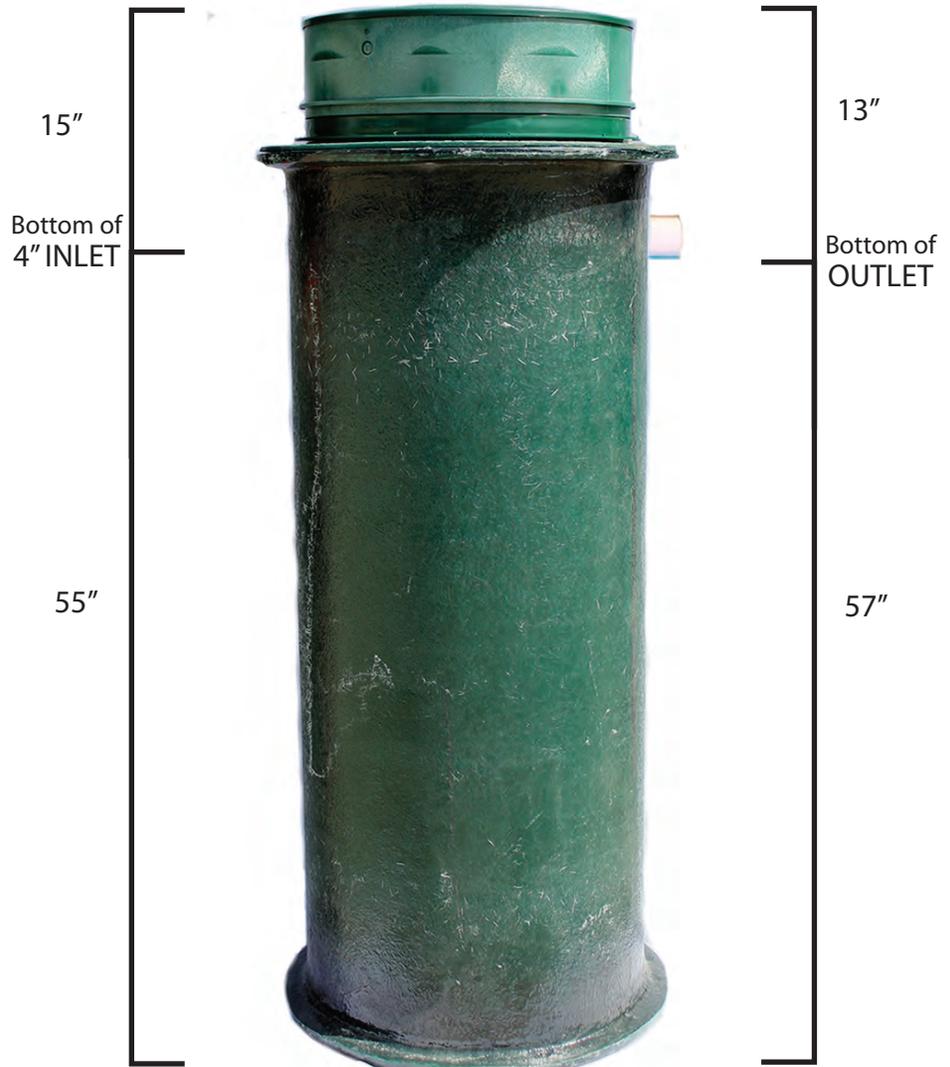

### STRONG FIBERGLASS DESIGN

This 120 gallon fiberglass tank is designed to be directly buried outside of the home. This tank can be used for collection of wastewater that will then be pumped using a submersible sewage, effluent, or grinder pump.

### DEFAULT TANK DIMENSIONS

- 28" Diameter x 70" Tall
- 120 Gallon Capacity
- 4" inlet hole with rubber grommet seal
- 2" or 1-1/2" outlet PVC hub (based on pump size)
- 55" from tank bottom to bottom of inlet
- 15" from tank access lid to bottom of inlet
- 57" from tank bottom to bottom of outlet
- 13" from tank access lid to bottom of outlet

Custom Inlet & Outlet Configurations Available

### RISERS AND HEAVY DUTY COVERS AVAILABLE
